

70-5526 Harness bypasses the factory THX amplifier located below the radio.

For dash disassembly instruction go to Metraonline.com and download the 95-5028, information located on page 4.

- 1) With the OE radio removed locate the factory amplifier under the radio support bracket.

- 2) Unplug the Green plug from the OE amp and plug in the 70-5526 green connector. Route the wires to the other radio plugs and wire to your aftermarket radio.

- 3) Connect the gray 24 pin plug from the 70-5526 into the matching 24-pin plug at the radio location and wire to your aftermarket radio. **DO NOT** connect the 24-pin plug to the 24-pin plug at the amp location.
