

## Product information sheet

# Axxess bassknob for AXDSP-X subwoofer control

## AXBK-1

This is an add-on accessory for the AXDSP-X. If you are using the AXDSP-X to install an aftermarket subwoofer and would like quick independent control of the subwoofer gain.

### Installation is extremely easy.

- Connect the **Orange** wire on the AXBK-1 to the **Orange** wire on the AXDSP-X 20-pin harness or the vehicles specific harness that was purchased.
- Connect the **Black** wire on the AXBK-1 to a chassis ground in the vehicle.

We provide two mounting options for the AXBK-1, there is a detachable mount so the gain control knob can be mounted under a dash or in a pocket, also provided, a washer and locking nut so the gain control can be flush mounted.
