

INTERFACE COMPONENTS

- AXRC-GMLN3 interface
- AXRC-GMLN3 harness

The AXRC-GMLN3 is designed to be used in non-amplified GM vehicles or in vehicles that the OEM amplifier has been bypassed; Onstar is not retained in either case. The AXRC-GMLN3 retains all the factory warning chimes that would be lost when the OEM radio is removed. It will also provide a 10 amp 12 volt switched accessory for proper radio operation, and retain the R.A.P. (Retained Accessory Power) feature if equipped.

DATA INTERFACE for GM Select Models

Chevrolet/Pontiac/Saturn **2005-2012**

Visit AxxessInterfaces.com for more detailed information about the product and up-to-date vehicle specific applications.
