

7" round Retaining Ring and Bracket for 7" replacement Motorcycle LED Headlight

HE-HB7 (Retaining Ring)

**Applications: 2013 and older Harley
Davidson's with the 7" round
headlight**

Tools Needed – Phillips Screwdriver

Instructions:

Refer to the motorcycle's instructional manual for proper headlight removal.

For most applications follow these steps:

1. Remove trim ring (if applicable) by removing (1) Phillips screw at bottom of trim ring.
2. Remove (3) screws from the headlight retaining ring and remove headlight.

3. Remove (4) screws from the headlight bracket and remove bracket.
4. Install new **HEISE** headlight bracket with the previously removed (4) screws.
NOTE: HEISE headlight bracket will come with foam tape already installed on bracket to reduce vibration. **If installing the HE-BHL704 REMOVE the foam tape from bracket.**
5. Remove new retaining ring from bracket and install the new LED headlight then reinstall the retaining ring with the (3) screws.
6. Reinstall the trim ring (if applicable) around headlight with the Phillips screw.

Specifications:

Zinc plated for corrosion resistance
