### PRODUCT OVERVIEW

Function meets style in these 48" and 60" Sequential LED Tailgate Lightbars. Increase visibility and safety on the road with eye-catching left and right sequential turn signals, running, brake, and reverse lighting functionality. Featuring highly concentrated LEDs, these lightbars provide seamless lighting with no dark spots. A pre-wired 4-pin trailer harness is included for simple plug-n-play installation, along with an adapter for hardwiring on trucks without trailer connectors. No drilling is required, simply attach below the vehicle tailgate using the included 3M adhesive tape. These lightbars are sealed to prevent moisture or dust from infiltrating behind the lens and are rated IP67 to withstand the elements. With universal vehicle fit applications, this product offers a versatile lighting solution for a wide range of trucks and SUVs.
