19+ H-D GTS CarPlay/Android Auto activation plug

This installation is inside front Fairing.

For instructions on how to remove fairing, please reference metraonline.com. Search BC-HDR-K1.

1. Using a pry tool pop off the support holding the OE plug into place. (Fig: A)

2. With fairing removed, disconnect the OEM plug from harness or dust cover. (Fig: B)

Fig: A

Fig: B

3. Connect the BC-9728 to the OEM harness, and reinstall harness support to inner fairing.
   NOTE: Will not work with H-D WHIM (Wireless Headset Interface Module) systems.

4. Complete install by connecting phone to USB, and allowing the connection on the mobile device.
