WIRING & ANTENNA CONNECTIONS (sold separately)

Wiring Harness: 70-7901

Visit metraonline.com for audio/video and steering wheel control interface options.

Antenna Adapter: Not required

TOOLS REQUIRED

- Panel removal tool • Phillips screwdriver

Attention! With the key out of the ignition, disconnect the negative battery terminal before installing this product. Ensure that all installation connections are secure before cycling the ignition to test this product.

DASH DISASSEMBLY

From the center console:

1. Unclip ashtray to reveal (1) Phillips screw and remove. (Figure A)
2. Open storage compartment and remove (2) Phillips screws. (Figure B)
3. Locate the (2) Phillips screws on the front sides of the gear shifter trim panel and remove. (Figure C)

(Figure A)

(Figure B)

(Figure C)

4. Unscrew gear shift knob. (Figure D)
5. Unplug (2) connectors and remove the center console. (Figure E)

(Figure E)

DASH DISASSEMBLY (CONT.)

From the factory radio assembly:

1. Unclip and remove center air vents to reveal (2) screws at the top of the radio trim panel. Remove the (2) screws. (Figure F)
2. Unplug and remove the radio trim panel. (Figure G)
3. Remove the (4) Phillips screws and pull out the radio assembly. (Figure H)

(Figure F)

(Figure G)

(Figure H)

4. Remove (2) Phillips screws from the support bar on top of radio trim. Save bar for kit preparation. (Figure I)
5. Remove (2) Phillips screws to remove the hazard switch. Save switch for kit preparation. (Figure J)
6. Remove (1) screw from each air vent retaining clip. Keep together for kit preparation. (Figure K)

(Figure J)

(Figure K)

KIT PREPARATION

1. Secure the support bar to the top of the **radio housing** using the (2) screws removed in step 4. (Figure A)
2. Secure the hazard switch using the (2) #8 x 1/2" Phillips screws provided. (Figure B)
3. Transfer the retaining clips to the corresponding locations on the **radio housing** using screws removed in step 6. (Figure C)

(Figure A)

(Figure B)

(Figure C)

4. Attach the **radio trimplate** to the **radio housing** using (6) of the supplied #8 x 3/8" Phillips screws. (Figure D)
5. Attach the (2) **panel clips** to the **radio housing**. (Figure E)

Continue to Kit Assembly

(Figure D)

(Figure E)

KIT ASSEMBLY

ISO DIN radio provision with pocket

1. Attach the **pocket** to the **radio brackets** using the (4) supplied #8 x 3/8" Truss-Head Phillips screws. (Figure A)
2. Slide the radio into the bracket/pocket assembly and secure it using the screws supplied with the radio. (Figure B)
3. Locate the factory wiring harness and antenna connector in the dash, and complete all necessary connections to the radio. Metra recommends using the proper mating adapter from Metra and/or AXXESS.
4. Slide the radio into the sub dash and secure it using the factory hardware.
5. Reassemble the dash in reverse order of disassembly using the new **7528 radio housing**.

(Figure A)

(Figure B)

KIT ASSEMBLY

ISO DDIN radio provision

1. Attach the **radio brackets** to the radio using the screws supplied with the radio. (Figure A)
2. Locate the factory wiring harness and antenna connector in the dash, and complete all necessary connections to the radio. Metra recommends using the proper mating adapter from Metra and/or AXCESS.
3. Slide the radio into the sub dash and secure it using the factory hardware.
4. Reassemble the dash in reverse order of disassembly using the new **7528 radio housing**.
