## Mounting the LED whip light antenna mast.

- **Mounting base requires a ½" hole, insert into desired mounting location.**

- **Using the flat washer, locking washer and nut secure base to mount with a 19mm wrench.**
Placing Flag on mast.

- **Insert screw into clamp, placed in desired location on the mast. Place double ring on screw, closing clamp around ring and tighten using supplied nut. Using carabiner insert into open end of the ring.**
Attaching the mast to the base.

- Line up holes in base and mast, insert pin until spring is compressed. Rotate lock to secure, then release pin.

Connecting HEISE controller.

- Connect the whip to the controller. Align the arrows to each other, and tighten the screw cap. Connect the red wire to a 12V source and the black wire to a chassis ground.

RED: 12VDC Accessory power
(10A fuse recommended)

Black: Ground

PRO RGB
CONTROLLI

The controller has the option for turn signal and brake functions. By connecting the following wires, the whip will flash amber with vehicle's turn signal, and illuminate red when braking.

Green wire - Left turn signal (+12VDC)
Yellow wire - Right turn signal (+12VDC)
White wire - Brake light (+12VDC)

RGB Controller:

- **Scan QR code to download HEISE Connect app.**
- **In the app set pixel count to 43**
