Sunday: 10:00AM - 4:00PM

Closed for most US Federal Holidays

Prior to install, run all wire required for installation of a subwoofer. Terminating at the back wall and storage compartment of the UTV.

1. Using supplied M6x12 bolts, secure feet to enclosure with T25 wrench.

4. Locate the enclosure into the storage area.
 5. There are nubs cast into the factory floor, do your best to align the feet to these locations.
Mark the holes, where to drill the mounting holes.
-  **Safety first: Please wear proper equipment when cutting or drilling.**
2. Using a 3/16" drill bit, make pilot holes for the supplied mounting screws with a T25 wrench.
NOTE: The rear inner screw will require the use of an extension longer than the enclosure is tall to tighten it down.
 3. Complete installation inserting wires into rubber block, to ensure a water-resistant joint to the enclosure.
