

**Wire run for part:
70-2003, 70-2103,
70-2104, 70-2105,
70-6522, 70-9003**

Note: The harnesses listed above are basic and do not provide accessory power.

The included **Red** wire will need to be run to the fuse box to supply accessory power to the aftermarket radio. A brass fuse tap is provided to assist you in tapping into the fuse box. If you prefer a wiring harness that will provide this function for you please visit metraonline.com for a harness that has accessory power support.
