## TE-DVR-PS / TE-DVR-PSEXT WATER RESISTANT DUAL-CAMERA AND DVR SALES 800-221-0932

### PRODUCT OVERVIEW

The TE-DVR-PS is a water-resistant dual-channel dash cam designed for motorcycles, ATVs, UTVs, boats or other outdoor vehicles. This kit includes front and back cameras that provide 150-degree viewing angles and 1080p video recording at 30 frames per second for high-quality video playback. Both cameras and the control box are IP67 rated. Video is recorded and stored on a Micro SD card protected behind a water-resistant door on the Wi-Fi enabled control box. The free RoadCam smartphone app can be used for video playback of past recordings. It is also helpful to use when installing the system to ensure correct camera positioning. The TE-DVR-PSEXT is a 8-foot extension cable with IP67 rated connectors used to extend the rear camera of the TE-DVR-PS (sold separately). For drivers who want to protect themselves from liability in the event of an accident or simply record their adventures, the TE-DVR-PS is a reliable water-resistant choice for outdoor vehicles.
