### PRODUCT OVERVIEW

This camera kit solves the visibility challenge when adding an aftermarket backup camera to a Jeep® with a rear spare tire. Designed to mount to the factory studs of the spare wheel, the adjustable bracket creates an inconspicuous solution for the camera to be placed at the optimal position for rearview visibility. This kit includes iBeam's Flush Mount Backup Camera with metal housing (TE-FLC). This CMOS camera features a 110-degree viewing angle and 0.5 lux night vision. This camera is AHD and CVBS compatible. The camera is small, unobtrusive, and has high-quality metal housing, rated IP68.

### FEATURES

- Head of bracket is bendable for angle adjustment
- High quality metal housing
- 1/4-inch CMOS camera
- AHD & CVBS compatible
- Defeatable Parking Lines
- Resolution: 720 x 480 (CVBS), 1280 x 720 (AHD)
- Field of View: 110° (Horizontal), 170° (Diagonal)
- 0.5 lux night vision
- IP68 Rating (water-resistant & dust proof)

**Note: We recommend the TE-CAMFLTR be used if power is being connected via the taillight. (sold separately)**

WHITE loop controls parking guide lines. Its behavior is affected by the Green loop.

GREEN loop enables AHD (Analog HD) video output. This higher resolution method of transmission gives superior quality images, but is only compatible with AHD capable monitors and displays. Uncut, the camera displays standard NTSC video at 480i resolution. Cut, the camera transmits at 720p resolution.
